Not illustrated. 1875 Excerpt: .for minerals; making a cold tough soil; usually barren of fossils; but in certain places full of small shells (Lingula melia and Discina Newberryi) in its lowest layers just over the Berea grit also a few fish scales (Palaeoniscus) and shark s teeth (Cladodus.) The Erie Clay of Sir W. E. Logan s Canada Reports. t His Sub-carboniferous System. As at Berea and Chagrin falls. It is of importance to note that Mr. Carll s horizon of fish spines is at or above the top of his First Mountain Sand, and always in fragments of thin layers of red sandstone. The beautiful scenery at Cuyahoga Falls is produced by the river cutting through the Conglomerate ai: d then excavating a gorge 300 deep and a circular plain out of the Cuyahoga Shales. The name for the formation is, therefore, well chosen, having been adopted from...
