Report on the Adaptation of Russian and Other Fruits to the Extreme Northern Portions of the United States Volume 1-2

By Theodatus Timothy Lyon

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1888 Excerpt: .influences of the Great Lakes westward of eastern New York and thence to Wisconsin and Minnesota, modified as such influences are by the direction of prevailing winds, that a climatic division of this region upon parallels of latitude become impracticable. In central and western New York, and equally in the lower peninsula of Michigan, these influences are so far equivalent to the oceanic influences which modify the climate of southern and eastern New England, that their pomology is practically identical, and may therefore be considered as mainly without the scope of the subject under consideration. (3) The Wisconsin lake district includes a comparatively limited region in Wisconsin, lying along the western shore of Lake Michigan, which derives a very perceptible climatic advantage from such proximity, which would doubtless be fully the equivalent of that realized upon the eastern shore, but for the fact that the prevailing...
